

The Portland Assembly in creating a locally-based movement that will resist and organize against the oppressive politics of the new president elect. We need your fire and energy to support, build and strengthen our community through mutual aid, relationship building and direct action. We're building a movement for direct democracy!

The Portland Assembly will be helping bridge the gap between “what is” and “what can be” by facilitating an ongoing city wide spokes-council. The Portland Assembly will create a space for building affinity groups, sharing projects, discussing topics we are organizing around, promote collaboration and solidarity, incubate initiatives and build our collective capacity as an organizing force. This is a space to plug in and organize with other members of our community around the most critical issues.

We have reached out to you because of the great work you do in the community and because we believe that your work aligns with our vision and principles. We are asking for your inclusion in the ongoing city-wide spokescouncil and hope you will join us in uniting the fight! We would also like to support your organization by providing you with a space to table at this event.

We'll be having our initial session and open house on December 17th. This will look a little different than the monthly spokes-council as we will be facilitating and providing space for affinity groups to develop around critical issues. A traditional spokes-council will be implemented at the January session.

Let's Keep Portland Powerful after Election Day!
Love and Solidarity, Portland Assembly.
